

AUGEO CLEAN MULTI

We declare that **AUGEO CLEAN MULTI** is obtained from the acetalization reaction of glycerin with ketones compounds and is intended for technical uses.

In the context of the European Directive 2000/13/EC and its successive amendments, labelling of major allergens and their derivatives as listed in the Annex IIIa of the Directive is required for ingredients present in foodstuffs.

Thirteen food allergens and their derivatives are not expected to be present in **AUGEO CLEAN MULTI** because they are not added intentionally during the whole manufacturing process. Based on our knowledge of the raw materials used and the manufacturing process, we have no reason to expect any of these substances to be present in the final product or to be formed either during the manufacture or under normal handling, storage and use conditions. Nevertheless the presence of soybean-derived food allergens at trace levels in **AUGEO CLEAN MULTI** cannot be excluded because one of the vegetable origins of purchased glycerin is soybean.

Food Allergens

Above statement is valid for AUGEO CLEAN MULTI manufactured in the plant in :
São Paulo (Brazil)

Information given above corresponds to the current status of our knowledge (July 2014).

LEGAL STATEMENT

The above information is provided for our customers only (and we accept no liability to any third parties) and reflects our current knowledge and experience of the product. All products are supplied in accordance with our general terms and conditions for sale. We can accept no liability for the effects of any chemical combinations or mixtures of the product which are carried out by our customers or third parties. In using the product our customers are reminded to comply with all relevant legal, administrative and regulatory requirements and procedures relating to its use and the protection of the environment.
