

## AUGEO CLEAN MULTI

We declare that **AUGEO CLEAN MULTI** is obtained from the acetalization reaction of glycerin with ketones compounds and is intended for technical uses.

In the context of the European Regulation N° 999/2001 and its subsequent amendments rules have been laid down for the prevention, control and eradication of certain Transmissible Spongiform Encephalopathies (TSE) in animals.

This Regulation applies to the production, placing on the market and in certain cases the exportation of live animals and products of animal origin.

**AUGEO CLEAN MULTI** is originating from glycerin of vegetable and animal origins. Nevertheless according to information received from the raw material suppliers and the evaluation of the ingredients intentionally added during the manufacturing process of **AUGEO CLEAN MULTI** the risk of contamination with the BSE/TSE infectious agent is probably not expected in this context.

---

### Transmissible spongiform encephalopathies (TSE) Bovine spongiform encephalopathy (BSE)

---

Above statement is valid for AUGEO CLEAN MULTI manufactured in the plant in :  
São Paulo (Brazil)
